**APRIL 1, 2024 @ 6:30 PM**  
**LAMONI LIVESTOCK AUCTION**  
900 E MAIN ST, LAMONI, IA

### INSPECTION OF CATTLE

Bulls will be available for viewing at Lamoni Livestock Auction from Thursday, March 28 until the start of the sale on April 1. All bulls will have ID tags corresponding to catalog numbers.

### HEALTH

Interstate health papers will be furnished on all bulls selling. **ALL BULLS HAVE PASSED A BREEDING AND SEMEN EVALUATION** by Shawn Nicholson DVM.

### TERMS & CONDITIONS

- All bulls are to be paid for immediately after the sale.
- Bulls sell according to the Terms & Conditions of the American Angus Association.
- Registrations papers will be transferred to the buyer at the seller's expense.

### TRUCKING

Cattle are expected to be taken home after the sale. Please speak with the consignor or sale manager if you are in need of trucking options.

### INSURANCE

Will be available sale day. Please notify sale staff at the time of settlement if you desire to purchase.

### LIABILITY

All persons attending this sale do so at their own risk, legal or otherwise. The sellers, sale managers, auction service and sale staff assume no liability for property loss or any accidents that may occur.

### ANNOUNCEMENTS

From the block will take precedence over the catalog.

All bulls have been genomic tested to increase the accuracy of EPDs presented in this catalog.

**2XL Cattle Company**

*\*Retaining 1/3 ownership*

A no-holes bull with an EPD profile that rivals the best AI bulls in the breed. A bull with loads of performance without sacrificing structure or maternal excellence, he is the only bull in the breed with a CED +10, YW +160, and \$M over 110. His dam stems from the great 2XL Clova Pride 6230, prolific donor for Stevenson's Diamond Dot and now Judd Baldrige.

---

---

---

---

# A LOOK AT THE DATA

Individual bull intake was monitored via weighed feed bunks. Data was collected and sent to Iowa State University to be turned into the numbers presented throughout this catalog.

Yearling bulls  
were fed at

**WERNER**  
Feed Efficiency Testing Center

## **DRY MATTER INTAKE (DMI)**

Amount of feed consumed per day on a moisture-free basis (expressed in pounds)

## **FEED CONVERSION (F:G)**

How many pounds of dry-matter feed the animal had to eat to gain one pound of live weight. No adjustment made for diet energy content or age/weight differences.

## **ADJUSTED FEED:GAIN (ADJ F:G)**

Attempts to remove the age or size differences of the animals in the pen.

**A lower Adj F:G is desirable. Industry average is around 6.**

## **COST OF GAIN (COG)**

This puts a dollar value on the adjusted F:G. Multiply the average cost of feed during the test by the Adj F:G.

## **RESIDUAL FEED INTAKE (RFI)\***

Difference between actual feed intake and that predicted on the basis of the animal's gain and maintenance requirements for its body weight.

Expressed in pounds of intake.

*Average RFI is "0". Animals with a negative RFI are favored, because those animals have consumed less feed for their weight and gain than the average of their herd mates. For example, if a bull has a -1.3 RFI, he ate 1.3 pounds of feed less than predicted*

## **RESIDUAL AVERAGE DAILY GAIN (RADG)\***

Difference between actual weight gain and the gain predicted on the basis of dry matter intake, maintenance of body weight and fat cover. Expressed in pounds of gain.

*An average animal has an R-ADG of "0." Animals with a positive R-ADG value are favored because they have higher daily gains for the amount of feed consumed and their body composition (% fat). For example, if a bull has a .43 RADG, he gained .43 pounds per day more than predicted*

\*Relevance of these evaluations depend on a comparison of animals from the same weaning contemporary group (pre-weaning environment, pasture management, creep feed availability and age of dam have a marked effect on outcomes). To equalize pre-test environments, bulls were put through a 21-day warm up period.
